

STAT120: Quiz 1 (9/3)

Name: _____

1. Which statement about R and RStudio is correct?

- ☐ RStudio is a replacement for R, so R does not need to be installed.
- ☐ R is the programming language, and RStudio is an interface (IDE) for working with R.
- ☐ RStudio can only be used through an online environment like Posit Cloud.
- ☐ R and RStudio are two names for the same program.

2. Which statement about running code from an R script file is correct?

- ☐ You should not run code from an R script and should always type code directly into the console.
- ☐ You cannot save an R script file.
- ☐ You can highlight part of the code in an R script file and run only the highlighted portion.
- ☐ All lines of code in an R script must be run together.

3. If you don't have highlighted code in an R script file, what happens when you try to run code (by hitting Command + Enter on a Mac, or Ctrl + Enter on Windows)?

- ☐ The current line of code where the cursor is located will be run.
- ☐ Nothing will happen.
- ☐ The entire script will be run.
- ☐ An error message will be displayed.

4. Which of the following is the correct code to calculate $\sqrt{2}$ in R?

- ☐ `sqrt(2)`
- ☐ `sqrt: 2`
- ☐ `sqrt of 2`
- ☐ R cannot calculate square roots.

5. If you run `2+5` in R, what will be the output?

- ☐ 7
- ☐ 25
- ☐ "2+5"
- ☐ An error message will be displayed.
